Phosphene, Tenacious, Indelible, Lambast, Magnanimous

1. Phosphene (फॉस्फीन) (Noun) (FOS-feen) (Scientific/Neutral)

- **Meaning (English):** A sensation of light caused by pressure on the eyeball or stimulation of the retina, not by light entering the eye.
- **Meaning (Hindi):** वह चमक जो आँख बंद करने या दबाव पड़ने पर दिखती है, पर जो असल में रोशनी नहीं होती।
- **Origin Flowchart & Etymology:**
 - Greek *phōs* (light) + *phainesthai* (to appear) → Latin *phosphēnus* → Modern *Phosphene*
- **Synonym + Antonym:**
 - **Synonym:** Visual aura, optical illusion
 - **Antonym:** Photorealism (as literal light-based sight)
- **Connotation:** Scientific/Neutral
- **Pictorial Scenario:** A person rubs their closed eyes and sees dancing colorful dots in a dark room.

- **Use in Non-Fiction (100 words):**

Phosphenes are commonly experienced when one rubs the eyes or during fatigue. Despite being a normal neurological phenomenon, phosphenes also fascinate neuroscientists and artists alike. They're not caused by external light but are the result of the retina being mechanically stimulated. Understanding phosphenes helps in studies of human vision, migraine auras, and even hallucinations during sensory deprivation.

- **Correct and Incorrect Usage (English + Hindi Equivalent):**

-  **Correct:** I saw phosphenes after rubbing my eyes for too long. (मैंने अपनी आँखें ज़्यादा देर तक मलने के बाद रोशनी की आकृतियाँ देखीं।)
