Redressal of grievances is a cornerstone of a fair judicial system. In democratic societies, governments establish mechanisms to ensure that citizens can voice their concerns and receive appropriate resolutions. For instance, consumer protection laws mandate redressal forums where customers can challenge unfair trade practices. Similarly, labor laws enforce redressal policies that protect employees from workplace

discrimination. Without effective redressal systems, dissatisfaction can escalate into protests, legal battles, or even civil unrest. Historically, the lack of redressal led to revolutions and social movements, such as the labor movements of the 19th and 20th centuries.

 - **Feudalism – The Backbone of Medieval Societies**
 - The word **feud** relates to conflicts, but its root also connects to **feudalism**, a hierarchical system that dominated medieval Europe. Feudalism was a socio-political structure in which land was exchanged for loyalty, service, and protection. It shaped governance, economy, and societal roles for centuries.
 - **Key Features of Feudalism:**
 - **Land-Based Economy** – Wealth and power were tied to land ownership rather than currency.
 - **Hierarchy of Power** – The King granted land (fiefs) to nobles, who in turn had vassals (knights) serving them. Peasants (serfs) worked the land in exchange for protection.
 - **Loyalty & Obligations** – Lords and vassals had a mutual agreement: vassals provided military service, and in return, lords ensured their safety and sustenance.
 - **Decentralized Rule** – Unlike modern centralized governments, power was divided among lords, leading to small, semi-independent territories.
 - **The Decline of Feudalism:**
 - **The Black Death** (1347–1351) drastically reduced the labor force, shifting power to workers.
 - The rise of trade and cities made wealth more liquid, reducing dependency on land.
 - Centralized monarchies gained strength, reducing the influence of lords.
 - The printing press (15th century) spread knowledge, encouraging societal shifts toward education and individual rights.
 - **Modern-Day Parallels:**
 - While feudalism is long gone, power structures based on hierarchy still exist in corporate settings, where CEOs (kings), managers (lords), and employees (vassals/serfs) maintain a chain of command.
