structure, as it helps maintain logical flow between paragraphs. It signals the reader to pay attention to exceptions, limitations, or contradictory findings. Whether in scientific journals or opinion essays, “however” plays a pivotal role in nuanced argumentation.

- **My Notes:**

- **Adverb – Common Usages of “However”**

- **1. To introduce contrast or contradiction**

- **Meaning:** But / Nevertheless / On the other hand
-  Used to contrast ideas between two clauses or sentences.
- **Examples:**
 - She studied hard. However, she didn't pass the exam. (Shows contrast between studying hard and not passing.)
 - The hotel is expensive. However, the service is excellent. (Opposition between cost and service quality.)
- **Structure Tip:** Usually placed at the start of a sentence and followed by a comma, or after a semicolon in formal writing.

- **2. To mean "in whatever way" / "no matter how"**

- Used in descriptive or conditional clauses.
-  Often introduces flexible/extreme conditions.
- **Examples:**
 - You can decorate the room however you like.

- However hard he tries, he can't beat her in chess.
- In these cases, "however" modifies the verb and describes the manner, not contrast.

■ 3. To indicate degree or intensity (Formal)

- **Meaning:** To whatever extent / No matter how much
- **Examples:**
 - However difficult the path, we must keep going.
 - However late you arrive, let me know.

○ However as Conjunction

- however is not traditionally a conjunction, it is often used like one in modern English—especially in formal writing—to connect contrasting ideas between two independent clauses.
- Instead, it's an **adverbial connector** that behaves like a conjunction, but needs proper punctuation.

1. Connecting two independent clauses (with punctuation)

- **Structure:** [Independent clause]; however, [independent clause].
- **Examples:**
 - I wanted to go to the beach; however, it started raining.
 - She studied all night; however, she failed the test.
 -  Here, "however" shows contrast and functions like a conjunction, but needs a semicolon or period before it, and a comma after it.

2. With a period (two separate sentences)

- **Structure:** [Sentence]. However, [new sentence].
- **Example:**
 - He said he would come. However, he never showed up.

○ "However" Case — Adverb vs. Conjunction

■ As an Adverb

- "However" = in whatever way / to whatever extent
- **Example:** She can dress however she wants.

- (However = In whatever way she wants) This is clearly an adverb because it modifies the verb dress.

- **As a Conjunctive Adverb (acts like a conjunction)**

- It connects two complete sentences, showing contrast — BUT needs punctuation.
- **Example:** He was tired; however, he kept working.
- "However" links two independent clauses, but grammatically, it's an adverb that modifies the second sentence as a whole, not a true conjunction like but.

- **Tricky Words That Often Confuse:**

- These are adverbs that behave like conjunctions:

- However (contrast)
- Therefore (result)
- Moreover (addition)
- Consequently (result)
- Nevertheless (concession)

- **THAMOs**

- Therefore, However, And, Moreover, Otherwise

- **!** They are NOT true conjunctions (like but, and, so, because), but they connect ideas. You must use punctuation with them!

- **Quick Tip:**

- If you can replace the word with "and" or "but" without changing punctuation, it's probably a conjunction.
- If it needs punctuation (like semicolon/comma or period), it's likely an adverb in conjunctive role.

5. Contend (दावा करना / संघर्ष करना) (Verb) (kuhn-TEND) (Assertive/Challenging)

- **Meaning (English):** To argue or assert a position strongly; to struggle or compete.
- **Meaning (Hindi):** दावा करना; संघर्ष करना; मुकाबला करना
- **Origin Flowchart & Etymology:**
 - Latin *contendere* → **com-** (together) + **tendere** (to stretch/strive) → Old French *contendre* → **English contend**

 - **Synonyms:** assert, argue, compete
 - **Antonyms:** accept, surrender, concede
- **Connotation:** Emphasizes struggle or opposition, used in both argumentation and sports.
- **Pictorial Scenario:** Two chess players mentally contending for the title.

- **Use in Non-Fiction (100 words):**

In academic discussions, authors often contend certain theories or viewpoints. For instance, an economist may contend that inflation is more driven by supply-side issues than monetary policies. In legal writing, lawyers contend various interpretations of the law. The word “contend” is powerful in formal contexts where a strong stand or a claim

needs to be established. Similarly, in sports journalism, athletes are said to contend for titles, underscoring the idea of active competition.
