Align behavior with values and systems that reward integrity, so outcomes feel earned rather than imposed.

- **Pictorial Scenario:** A structure collapsing inward under pressure.

- **Use in Non-Fiction (in 100 words):**

Implode is widely used in economic, political, and organizational non-fiction to describe internal collapse. Unlike “explode,” it emphasizes inward failure rather than outward damage. Regular self-review, honest feedback, and course correction prevent implosions and turn stress into controlled transformation instead.
