Construe, Moldy, Imminent, Crackle, Persuade

1 **Construe (व्याख्या करना) (Verb) (con·strue) (Formal / Analytical)**

- **Meaning (English):** To interpret or understand the meaning of something in a particular way.
- **Meaning (Hindi):** किसी बात का अर्थ निकालना या उसकी व्याख्या करना।

• **Use in Non-Fiction (in 100 words):**

In legal and academic contexts, how information is construed often determines outcomes. Policies, contracts, and statements are rarely self-explanatory; they require interpretation within context. Different stakeholders may construe the same text

differently based on interests or assumptions. This makes precise language essential. Poorly drafted documents allow room for harmful misconstrual. Therefore, writers must anticipate how readers might construe their words to prevent ambiguity and dispute.

- **Correct and Incorrect Usage (English + Hindi Equivalent):**

- ✗ He construed quickly the room. (उसने कमरे की व्याख्या की।)

- **Word Hack of the Day (in 50 words):**

- Use construe when meaning is inferred, not stated outright. It fits situations where interpretation shapes outcome—laws, silence, behavior, or tone. If something is “understood as” rather than explicitly said, construe captures that mental process precisely.

- *Her remarks were construed as criticism.* (उसकी टिप्पणियों को आलोचना के रूप में समझा गया।)
- **Grammar Breakdown:**
 - S (Subject): Her remarks
 - V (Verb – Transitive, Passive): were construed
 - O (Object): — (None; passive construction)
